

YOUR REMOTE MONITORING SYSTEM

## DESIGNED FOR MOBILE MACHINES & SMART PRODUCTS

### The ORCHESTRA SOLUTION

is designed for remote diagnostics, monitoring and control of mobile working machines, special vehicles and any product of manufacturing to make them smarter by adding innovative digital services as required by the global market.

### CUSTOMERS

machine manufacturers, vehicle rental firms, dealers and their customers willing to track, monitor and assist their own assets during different operations.

### BENEFITS

results in cost savings for organization by shrinking technical on-site support, improving maintenance processing, preventing downtimes, and optimizing the schedule of different assets.

# DIGITAL INTENSIVE

*FOR INDUSTRY 4.0*

# ON PREMISES OR ON DEMAND AND PAY AS YOU GROW

## DIGITAL SERVICES

are made available by installing the IIoT Platform in the private or the public CLOUD of the Customers. Users may subscribe and activate the services on demand via the WEBPortal paying as they start using them.
